

HW06 CI/CD report

The GitHub Actions workflow runs the three Newman collections against the local backend on `ubuntu-latest` and uploads reporter output. Its implementation is version-controlled at `cicd/workflows/api-tests.yml` .

Required real GitHub evidence

- All-pass commit hash and Action URL: `PENDING HUMAN ACTION` .
- Intentional-failure commit hash and Action URL: `PENDING HUMAN ACTION` .
- Actual Actions pass screenshot: `PENDING HUMAN ACTION – replace screenshots/ci-pass.png` .
- Actual Actions fail screenshot: `PENDING HUMAN ACTION – replace screenshots/ci-fail.png` .

No current PNG in this directory is evidence until it is replaced by an authentic Actions capture.
